Nursery Products

WE believe it to be an advantage to our customers that we can offer them a large stock to select from. Not only do we offer an extremely large variety of plants, but an unusually large range of sizes in each variety.

To appreciate the time you will save by purchasing our matured trees, you can figure a tree 2 inches in diameter as being ten years old, and every inch above 2 inches in diameter represents three additional years of growth; thus a 5-inch tree is nineteen years old.

This Price List cancels all previous editions, and prices in this catalogue are for plants at the nursery.

Estimates.—We solicit the opportunity to estimate on all planting lists, either public or private. All such lists will be carefully estimated and promptly returned, giving full advantage of our best rates.

Personal Selection at the nursery is preferable whenever possible, but if this is not possible, and we are informed of your requirements, we will take special pains to make a suitable selection for you.

Visitors to our Nursery should notify our General Office, 940 Marquette Building, Chicago. Phone Central 2770 and 2771 and arrangements will be made to have them met at Glenview Station and the usual courtesies extended.

Shipping.—Being a suburb of Chicago, the greatest railway terminal in America, we

can assure direct routing and prompt delivery. Safe arrival is guaranteed. Orders lost or damaged in transit will be refilled without charge if proper notice is given. Within certain distances we are prepared to deliver by motor truck or wagon. These deliveries, however, are matters for special arrangements both as to time for delivery and as to charges.

Replacing.—Any of our nursery products which fail to live will be cheerfully replaced at half of the current "Each" price, provided they have been properly planted and cared for.

Boxing and Packing.—When Cash accompanies order, the packing and boxing will be done free of charge. Otherwise, packing will be charged for at the cost of materials used.

Payments.—All accounts are due when bills are rendered, and payment is expected by the first of the following month.

EVERGREENS

All our evergreens are shipped with a ball of earth and may be safely planted practically any time of the year except July.

PEONIES

THE QUEEN OF ALL PERENNIALS

THERE never was an old-time garden which did not have the Peony as one of its chief attractions. This queen of garden flowers never fails to produce a wealth of blossoms, nearly all of which are fragrant, colors varying from deepest crimson to pure white. It rivals the rose in brilliancy of color and perfection of bloom. The flowers of some of the sorts attain gigantic proportions, often measuring seven or eight inches in diameter, with stems two and one-half to three feet in length and sufficiently strong to support the blooms. Peonies should be planted in masses, with their colors separate, in order to get the best possible effect, but lend themselves to any form of gardening and grow to perfection in ordinary garden soil.

What Nelson Service Is

Our "Service Department" continues the work which has been well started by our "Nursery Department." After sowing the seeds and starting the slips in the nursery, the tender plants springing up are carefully nursed until they develop into large, vigorous plants; ready to go to the gardens of our customers. At this point the "Service Department" is ready to step in, and at a reasonable charge, deliver these plants to the grounds of our customers, arrange them artistically, plant them carefully and guarantee their replacement in case any of them fail to grow.

It may be readily seen that our "Service Department" will have more interest in the success of the planting than would the usual outside contractor who takes charge of such work.

In addition to the above, our "Service Department" is equipped for designing and preparing plans for all landscape improvements on the home grounds, and is ready to undertake the construction of the same on a percentage basis, furnishing a reliable estimate of the cost.
